

Thermal Solutions Is Proud To Announce The Release Of A New Line Of Premium Quality, Class 8 Truck Cores.

We Call Them the SBC and the All New SBX Core Line.

(SBC) 251002M	251102M	251218M	251118M
Kenworth	Freightliner	Peterbilt	Peterbilt
(SBX) 251002MX	251102MX	251218MX	

- SBC core design offers the OE design features:
- 3 rows of 5/8 tubes on 5/16 tube centers using highly louvered fin design
- SBX core design offers a 4 row design:
- 4 rows of 1/2 tubes on 5/16 tube centers using highly louvered fin design

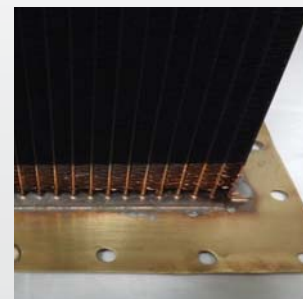

Whatever your customer demands, OE design and quality or extra tube rows, we've got you covered.

Both Model Designs Feature:

- 8.5 inch corner supports all four corners
- Under the header mounted side pieces for added strength
- Enhanced tube collar height
- Superior cooling
- Painted with a corrosion resistant paint
- Header gaskets are included

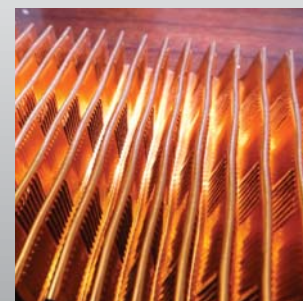

Under header mounted side piece for extra corner strength

8 1/2 inch corner reinforcements

Enhanced tube collar height for superior tube header bond

Highly louvered serpentine fin style
