

# EXTENSIVELY TESTED FOR PROTECTION IN HARSH ENVIRONMENTS

Heat exchangers are susceptible to environmental damage, which shortens the life of the unit. Core Coat® has been shown to extend the life of Heat Transfer equipment used in a wide variety of environments and industries including:

- Marine environments
  - Industrial
  - Agriculture
  - Chemical and Refinery operations
  - Transit
  - Mining
  - Oil Industries
  - Other harsh salt and chemical environments
- 
- In house Application Provides for Fast Turnaround
  - Cost effective
  - Does not effect heat transfer capabilities
  - Works with Copper/Brass, Aluminum, and even Steel including components
