Pre-Installation of a Replacement DPF/DOC

If a OEM DPF/DOC has failed and you have purchased a new TSM DPF/DOC for the replacement, it is important that the original cause of the DPF/DOC failure is repaired, prior to installing the new TSM DPF/DOC. The most common failures are usually engine or system controller related.

Normal DPF Conditions

Unacceptable DPF Conditions

- If presence of soot or other liquid stains is on filter outlet face or in outlet channel openings, warranty claim will be denied.

- If presence of melting filter surface on the inlet or outlet side, and or another thermal event, warranty claim will be denied.
