

R & D ENTERPRISES

A **TSM** COMPANY

We know cool

Heat exchangers, oil coolers, fuel coolers

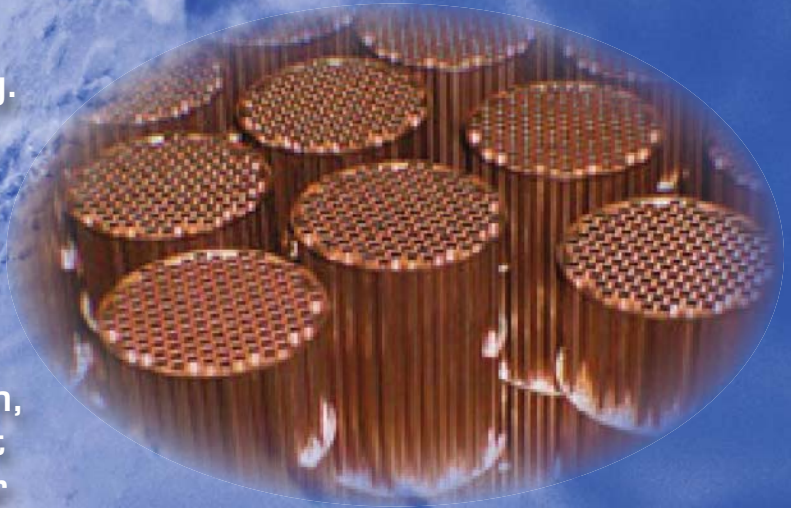

R & D Enterprises is recognized as the industry leader in innovative heat exchangers, oil coolers, fuel and steering oil coolers in the marine engine industry. But we know so much more than that.

Because our engineers understand cooling. They live and breathe it. They have the unique ability to analyze, comprehend, and resolve heat exchanger problems.

And we have the right equipment to meet whatever heat-exchanger demands our customers may have. Our new modern, 33,000 sq. ft. facility with state-of-the art computer modeling equipment enables our engineering team to build what you need, when you need it.

From the classic tube-and-shell, to the more economical tube-and-tube or concentric tube, we can design and build a prototype within 24 hours, and get your product to you fast.

Our product mix covers everything from liquid-liquid transfer to liquid-air transfer, including tube and fin heat exchangers. Whether it's copper, copper-nickel, aluminum or engineered polymers, we're experienced and ready.

R & D ENTERPRISES

Our engineering team is expert in designing and building all types of heat exchangers, using the state-of-the art computer modeling, we know how to get the results and get them quick.

Whether it's the classic tube and shell or the more economical tube and tube or concentric tube, we offer the ability to design and develop your product quickly including prototypes within 24 hours.

Our product mix covers everything from liquid-liquid transfer to liquid-air transfer including tube and fin heat exchangers.

Standard Products

- Tube and Shell
- Tube and Tube (concentric)
- Tube and Fin
- Tube and Plate

Typical Applications

- Marine engine coolers
- Oil and Transmission coolers
- Gen Set coolers
- Fuel and Steering coolers
- After coolers
